Shermco begins training courses at new Austin service center

DALLAS – Shermco Industries, a national provider of rotating apparatus and electrical power system testing, commissioning, repair, maintenance and training, recently began offering hands-on instructional courses at the company’s newly constructed 10,000-square-foot facility in Cedar Park, Texas.

Courses are designed to teach professionals across a broad range of industries, with varying degrees of experience, proper electrical safety procedures and techniques, as well as compliance requirements. “The facility allows us to expand our training efforts, while also providing NETA-Accredited testing and engineering services to more companies throughout the region,” said Kevin Ewing, operations manager for Shermco Austin.

The Austin Training and Service Center is among Shermco’s latest expansion initiatives, which also includes the recent acquisition of Coastal Switchgear & Controls in Angleton, Texas, and an upcoming service center opening in Sweetwater, Texas.

“We’re excited to bring Shermco’s full services to more customers in South Texas, West Texas and along the Gulf Coast,” said Ron Widup, executive vice president of Shermco. “Quality and responsiveness is what our customers need. As our customer base continues grow across the state and the country, our ongoing expansion ensures that we will always meet their needs.”

ABOUT SHERMCO

[Shermco Industries](http://www.shermco.com) is a provider of safe, reliable testing, repair, professional training, maintenance and analysis of rotating apparatus and electrical power distribution systems and related equipment for the light, medium, and heavy industrial base nationwide. Founded in 1974 in Dallas, the company is comprised of two strategic business units; Machine Services Division and an Engineering Services Division. With a corporate location in Irving, Texas, a sales office in Brussels and service centers in Austin, Tulsa and Sweetwater, Shermco Industries has over 250 full-time employees. The company is a member in good standing with the Electrical Apparatus Service Association, American Wind Energy Association and the International Electrical Testing Association.
