Brian Cardwell of Shermco Industries to deliver presentation at PowerTest 2010

Commissioning of Micro-Grids: A Technology Overview

DALLAS – February 15-18, 2010 electrical power systems manufacturers, vendors and thought leaders will meet at the 2010 PowerTest Electrical Maintenance and Safety Conference. The Conference will be held in Long Beach, Calif. at the Hyatt Regency Hotel.

Brian Cardwell, of Shermco Industries, will be among the conference’s distinguished lineup of speakers, giving a renewable energy track presentation on Commissioning of Micro-Grids: A Technology Overview.

“Micro-grid technology is all about building more reliable, more effective, and more efficient energy infrastructure,” said Cardwell. “Applying the micro-grid technology to green power sources creates not only an enhanced energy infrastructure, but a cleaner more sustainable energy solution.”

Cardwell’s presentation is scheduled for Monday, February 15 from 9:30 a.m. to 10:15 a.m. PST.

ABOUT SHERMCO

[Shermco Industries](http://www.shermco.com) is a provider of safe, reliable testing, repair, professional training, maintenance and analysis of rotating machines and electrical power distribution systems and related equipment for the light, medium, and heavy industrial base nationwide. Founded in 1974 in Dallas, the company is comprised of two strategic business units; Machine Services Division and an Engineering Services Division. With a corporate location in Irving, Texas, a sales office in Brussels and service centers in Austin, Tulsa and Sweetwater, Shermco Industries has over 250 full-time employees and exceeds \$65 million in annual revenues. The company is a member in good standing with the Electrical Apparatus Service Association and the International Electrical Testing Association. For more information about Shermco Industries, visit their Web site at www.shermco.com.
