Shermco Industries Wins Electrical Maintenance Contract for Georgetown Utility Systems

AUSTIN – Shermco Industries, a leader in electrical maintenance for light, medium and heavy industrial trade, has won a three year contract for electrical maintenance testing and repair for Georgetown Utility Systems in Georgetown, Texas.

[Georgetown Utility Systems](#) provides electric systems, water services, transportation services and systems engineering services for capital improvement projects to the city of Georgetown. The electric systems distribute power to Georgetown Utility Systems' homes and businesses with a service territory that covers 4.71 square miles, approximately 176 miles of overhead and 87 miles of underground electric lines. They service an estimated population of 28,328 with 14,969 electric meters, 4,834 distribution transformers and five substations.

“We are currently engaged in our work for Georgetown Utility Systems. This is a project very well suited for Shermco and we are proud to have been awarded the job,” said Kevin Ewing, general manager of the Shermco Austin office.

ABOUT SHERMCO

[Shermco Industries](#) is a provider of safe, reliable testing, repair, professional training, maintenance and analysis of rotating apparatus and electrical power distribution systems and related equipment for the light, medium, and heavy industrial base nationwide. Founded in 1974 in Dallas, the company is comprised of two strategic business units; the Machine Services Division and the Engineering Services Division.
