Shermco Industries' Mike Hancock to speak at Pro Energy Alliance NERC PRC-005-2 Protection Systems Maintenance Best Practice Workshop

DALLAS – Shermco Industries' Mike Hancock, manager of business development for engineering services, will be presenting at the Pro Energy Alliance NERC PRC-005-2 Protection Systems Maintenance Best Practice Workshop Sept. 20-21. The event is being held in Houston at the Four Points by Sheraton Houston Southwest.

Hancock will be speaking on the topics of: Best Practices for Testing DC Control Circuitry, CT and PT Testing and Maintenance, Communications Systems and Protective Relay Maintenance Practices.

The workshop, which includes presentations, case studies and panel discussions, aims to educate participants on the issues associated with performing maintenance and testing activities on protection system components. Attendees will learn skills such as the process of exchanging encoded information between machines, integration of PRC-008, PRC-011 and PRC-017 standards, mandatory maximum time intervals and minimum maintenance activities.

ABOUT SHERMCO

[Shermco Industries](http://www.shermco.com) is a provider of safe, reliable testing, repair, professional training, electrical outage planning, maintenance and analysis of rotating apparatus and electrical power distribution systems and related equipment for the light, medium, and heavy industrial base nationwide. Founded in 1974 in Dallas, the company is comprised of two strategic business units; the Machine Services Division and the Engineering Services Division. With a corporate location in Irving, Texas, a sales office in Brussels and service centers in Austin, Cedar Rapids, Des Moines, Houston, Sweetwater, and Tulsa, Shermco Industries has over 375 full-time employees. The company is a member in good standing with the Electrical Apparatus Service Association, American Wind Energy Association, Professional Electrical Apparatus Recyclers League, and the InterNational Electrical Testing Association.
