Shermco Announces July Webinar: “Manage Reliability: How Healthy are Your Cables?”

DALLAS – Shermco Industries will host a webinar on Wednesday, July 22 at 10 a.m. CDT entitled “Manage Reliability: How Healthy are Your Cables?”

The webinar will focus on various testing techniques applied to medium voltage cables. The goal of the session is to educate asset owners, electrical engineers, plant managers, reliability engineers and field technicians on the technologies relating to cable maintenance. Sandri enumerates the webinar’s following benefits:

- For reliability engineers, plant managers and asset owners: The webinar information will aid in developing a comprehensive cable maintenance program to determine the condition of their medium voltage cables. A cable maintenance program is done to help predict the remaining life expectancy, risk of failure and to prioritize cable replacement and/or injection. This predictive approach to maintenance further allows better management of maintenance costs and resources. Information related to the condition and quality of the cables allows maintenance efforts to be placed where they are most needed.
- For electrical engineers: The webinar provides an overview of the available testing options that allows the engineer to craft an acceptance and maintenance program that best meets the needs of his organization.
- For field technicians: The information will provide an overview of various test techniques and how they are performed in the field. The technician will also be introduced to the interpretation of test results.

ABOUT SHERMCO

Shermco Industries is the leading independent provider of safe and reliable acceptance testing, commissioning, maintenance, repair and remanufacturing of electrical equipment and power distribution systems. With service centers located throughout North America, certified technicians and engineers focus on servicing both scheduled and unexpected projects for large commercial, industrial and utility customers. Shermco, a leader in electrical safety and technical training, focuses on industrial electrical contracting, utility, wind turbine maintenance and disaster recovery services. Shermco Industries is a member in good standing with the Electrical Apparatus Service Association, American Wind Energy Association, Professional Electrical Apparatus Recyclers League, and the InterNational Electrical Testing Association. For more information about Shermco Industries, visit www.shermco.com.
