## **Shermco’s Kerry Heid to Present at CANWEA Annual Conference**

**REGINA Saskatchewan, Canada:** Kerry Heid, President of Shermco Canada, will present “Management of Electrical Power Assets” during a panel discussion at the Canadian Wind Energy Association’s Annual Conference and Exhibition, to be held at the BMO Center in Calgary, Alberta on November 1-3, 2016.

This panel session, titled “Windfarm Operations and Maintenance – A Look at Asset Management from Cradle to Grave,” will be moderated by Ian MacRobbie of Enbridge, and will cover several critical topics regarding managing the reliability and efficiency of utility scale wind energy projects.

Kerry is a past president of NETA (International Electrical Testing Association) and served on their board of directors for over 10 years and won their outstanding achievement award in 2010. He is also the technical committee Chair of CSA Z463 on “Maintenance of electrical Systems” and has been on the technical committee for CSA Z462 “Workplace Electrical Safety” since its inception in 2006.

“This is a great opportunity for wind site operators and owners to better understand what can be done to help insure equipment reliability and still produce energy at the lowest cost,” said Heid.
