Scott Carroll Hired as Business Development Manager

IRVING, TX: Shermco Industries announces that they have engaged Scott Carroll as business development manager for the Southeast US. Based in Nashville, TN, Carroll brings over 20 years' experience in electrical testing, program management and industrial maintenance. Carroll will be responsible for the growth of Shermco's electrical testing and reliability services throughout the region at key regional and national accounts as well as industrial, municipal and commercial facilities. Carroll is an USAF veteran, a master electrician and a NETA certified high voltage testing technician. His experience at Spectra Energy and at a major regional hospital will be of great value to both customers and to Shermco technicians.

"Shermco was able to help out in the Central Tennessee area after the 2010 flooding and I am very happy to be able to offer even more options for both routine and emergency electrical services," said Carroll.

"Scott brings a wealth of experience and expertise to our business development team and we are very pleased to have such a strong asset in this rapidly expanding region," said Jason Greer, vice-president of business development and national accounts.
